

Is Invisible Aligner Treatment for me?

Easier than ever!

Many adults and teenagers are eager to achieve beautiful smiles without wearing braces.

Simpli5 is an express aligner system that corrects the minor imperfections you dislike in only 5-6 months. **Simpli5** is ideal for the front 4-6 teeth that are visible when you smile, even if you have previously completed orthodontic treatment.

Simply schedule a consultation with us. Once we determine that you are a candidate, we will take impressions that will be used to develop a set of aligners precisely for your smile. **You'll be able to begin aligner treatment just 3-4 weeks later.**

Simpli5[™]
EXPRESS ALIGNER SYSTEM

The **Right Choice** for
Moderate Corrections
and **Relapse Cases**

Simpli5[™]
EXPRESS ALIGNER SYSTEM

- Most cases finish in 5 months.
- Ideal for any anterior case requiring minor to moderate corrections and orthodontic relapse.
- Impressions to aligners in just 3-4 weeks

Types of cases treated with Simpli5

Simpli5[™]

EXPRESS ALIGNER SYSTEM

Simpli5 is the best solution for cases involving **minor to moderate anterior** crowding or spacing and for orthodontic relapse cases.

What is Simpli5

- Developed for minor to moderate correction
- Only five virtually invisible plastic Aligners
- Aligners are only worn for 3-4 weeks at a time
- Custom crafted to give you the smile you deserve

Are you a candidate for Invisible Aligner Treatment?

Fast

- You can start treatment 3-4 weeks after taking an impression.
- Most cases are completed in 5 months.
- Wear each of 5 trays for only 3-4 weeks

Convenient

- Virtually invisible; you can confidentially work, exercise, and socialize while wearing your **Simpli5** aligners.
- Remove your aligners at meal time and for dental hygiene.
- **Simpli5** works for patients needing both dual arch or only one arch.

Comfortable

- Minimal discomfort.
- There is minimal to no speech interference.
- The unique flexible duraclear material allows for gentle, consistent movement.
